**Detailed Description Text - DETX (22):**

**The touch sensitive electronic display panel 14, in combination with the linear electronic scanner unit 26, provides an easy to learn and use interface that permits the operator to enter and retrieve data from the organizer with a minimal amount of effort. For example, FIG. 6 illustrates one type of information display that can be presented on the display panel 14 upon power-up of the organizer in a preferred mode of operation. The illustrated information identifies the owner of the organizer by name, address, company name (with company logo displayed) and photograph. The advantage of the illustrated**

**organizer over conventional types of organizers can most readily be appreciated through the realization that none of the information displayed in FIG. 6 must be manually entered into the organizer by the operator.**
